## Extra Challenge: Telly Times

Why not ask your child to look up when their favourite TV show is on – can they draw the start time on their clock in one colour and the end time in another?  
How long does the show last?

## Extra Challenge: Tricky Times

Give your child some tricky questions to represent on both the analogue clock (clock with hands) and digital clock.

For example, I started cooking dinner at 17:45, and finished cooking at 18:30. Can you show my start time on the analogue clock and finish time on the digital one?
